-->As a Reno resident my concern focuses on the route that nuclear waste from the states of Washington, Oregon and Northern California might possibly take to get to Yucca Mt. Given that the proposed Caliente corridor is a distinct possibility, will the waste from the above states travel the "spine" of California, divert to Las Vegas, travel through Barstow, CA, and then on to Caliente and subsequently Yucca Mt. or, is it possible that it could travel through Reno, NV, on to Salt Lake to Caliente and then to Yucca Mt.?

I have asked this question on numerous occasions of various private organizations, as well as government officials, and in all instances have never received a definitive answer, always being referred to material concerning the Caliente corridor which, of course, is insufficient.

Your help is appreciated in addressing this issue since, should the possibility exist of such waste moving through the Reno/Sparks area, city authorities will need to prepare for a range of eventualities.

Thank you,

040129

N.E. Thornsberry
